Table 4.2 The effect of particle size and porosity on the cake specific resistance ($\rho_s = 2500 \text{ kg m}^{-3}$) calculated using equation (4.31)

<i>Particle size, x (mm)</i>	<i>Porosity, ε</i>	<i>Specific resistance, α (m kg⁻¹)</i>
1	0.4	6.7×10^{11}
2	0.4	1.7×10^{11}
10	0.4	6.7×10^9
100	0.4	6.7×10^7
2	0.4	16.9×10^{10}
2	0.5	7.2×10^{10}
2	0.6	3.3×10^{10}
2	0.7	1.6×10^{10}
